- **INFO:** **class-tgm-plugin-activation.php** The theme appears to use include or require. If these are being used to include separate sections of a template from independent files, then **get_template_part()** should be used instead.

Note: While the automated theme scan is based on the Theme Review Guidelines, it is not a complete review. A successful result from the scan does not guarantee that the theme will pass review. All submitted themes are reviewed manually before approval.

Your theme has failed the theme check. Please correct the problems with it and upload it again. You can also use the [Theme Check Plugin](#) to test your theme before uploading. If you have any questions about this please contact theme-reviewers@lists.wordpress.org.

Information about Theme development is available on the Codex at [Theme Development](#). For questions about Theme development please use the [Themes and Templates forum](#).

Make sure to review the guidelines at [Theme Review](#) before uploading a Theme.

We will be reviewing your Theme using the sample data available in the WordPress export file available at [Theme Unit Test](#). Before uploading your Theme file please test it with this sample export data.
